

Moffat Community Observatory

Clear Night Policy and Bookings

Moffat will on average have about 2 nights every week suitable for viewing the night sky.

The weather is of course completely beyond our control but this does mean that most of the sessions that are booked in advance will be unable to proceed due to cloud conditions, and you will appreciate that it simply isn't possible to operate a visitor policy other than on the basis of advance bookings.

You can therefore expect the session to be cancelled if weather conditions are not suitable and this will be confirmed by text message to the phone number you provided. Please make allowances for a late as possible notification - our weather is nothing if not changeable. If you need to travel please contact your staff member in advance to determine the possibilities for the evening.
